About me

I would love to involve myself in an organization where I will be able to deliver my skills through my hard work and dedication towards my responsibility. I always try to learn new things to build up my professional skills. In the future, I want to see myself in a place where I can utilize my capabilities to the fullest benefits of the organization and society.

Skills

OOPL (Java, C++, PHP)

HTML,CSS,Bootstrap,JavaScript

Laravel Framework

MySQL

Version Control tool (Git,Github)

Microsoft Office(Word,PowerPoint,Excel)

(*)[The skill scale is from 0 (Fundamental Awareness) to 6 (Expert).]

Education

2016 – 2019 Bachelor of Science in Computer Science and Engineering (CSE)
North South University
CGPA: 3.76 (out of 4)

2013 - 2015 Higher Secondary School Certificate (HSC)
Shaheed Bir Uttam Lt Anwar Girl's College
GPA-5.00 (out of 5) | Board: Dhaka

2013 Secondary School Certificate (SSC)
Gulshan Model High School and College
GPA-5.00 (out of 5) | Board: Dhaka

Haque, "RFID based Smart Transportation System with Android Application," 2020 2nd International Conference on Innovative Mechanisms for Industry Applications (ICIMIA), Bangalore, India, 2020, pp. 614-619, doi: 10.1109/ICIMIA48430.2020.9074869.

Experience

2020 Web Developer
August 01, 2020 - Present
Bangla Puzzle Limited

2020 Internship (Web Application Development)
January 19, 2020 - July 19, 2020
Bangla Puzzle Limited

2019 Undergraduate Teaching Assistant
February 26, 2019 - January 6, 2020
Department of Mathematics and Physics
North South University

Final Year Project

NSUTS: Smart Transportation System for North South University

Supervised By
AKM Bahalul Haque
Lecturer, Department of Electrical and Computer Engineering
North South University

Project Summary: My final year senior design project is based on the prototype of Radio Frequency Identification (RFID), Global Positioning System (GPS) and android application for authentic fare calculation, real-time tracking and passenger management. The passenger can reserve a seat on a bus, can see the available seat information of a bus and can track the real-time location of the bus through their android application. After getting into a bus, the passenger needs to swipe the RFID card through which RFID based bus fare payment system will take place. A web application is also developed to monitor the whole system so that this system can ensure the security of the passenger. So, this project emphasizes on minimizing the problems faced by the passengers, drivers and the concerned authority.
